- Collaborated in an Agile Scrum environment to successfully deliver a small-scale Java based Android app.
- Applied Agile and Extreme Programming (XP) principles throughout the software development lifecycle.

EDUCATION

Bachelor of Technology in Computer Science | LNCT Bhopal (RGPV) *MP, India* | **2017 - 2021**
- Cumulative **GPA**: 7.27/10
- **Relevant Coursework:** Analysis Design of Algorithms, DBMS, Data Structures, Theory of Computation, ML.

Masters in Software Engineering | California State University Fullerton *Fullerton, CA* | **2022 - 2024**
- Cumulative **GPA**: 3.8/4
- **Relevant Coursework:** Software Design and Architecture, Systems and Software Standards and Requirements.

SUMMARY

I'm a Full-Stack Developer with a Master's in Software Engineering who loves building web applications. I founded my own company to develop a productivity-focused web app, which gave me hands-on experience in product development, UI/UX, and AI integration. Now, I'm looking for opportunities to work in a real-world environment, collaborate with great teams, and continue growing as a developer.

SKILLS

Programming Languages	Web Development	Tools & Technologies	AI and Data Handling
Python, JavaScript HTML,CSS	HTML, CSS MERN Stack Backend: Flask, Django, RESTful Services	Version Control: Git, GitHub Actions Testing: Selenium, Pytest	AI Integration Data Handling: Storage and Retrieval, User Profiles Customization
